PROJECT TITLE

Employee Performance Analysis using Excel

AGENDA

1.Problem Statement
2.Project Overview
3.End Users
4.Our Solution and Proposition
5.Dataset Description
6.Modelling Approach
7.Results and Discussion
8.Conclusion

PROBLEM STATEMENT

- The need to analyze and enhance employee sales performance to improve overall business revenue.

PROJECT OVERVIEW

- This project aims to assess the sales performance of employees using advanced data analysis techniques.
WHO ARE THE END USERS?

- Managers, HR teams, and senior executives who need actionable insights to make informed decisions.

OUR SOLUTION AND ITS VALUE PROPOSITION

- A data-driven approach to monitor employee performance, identify top performers, and address areas for improvement.
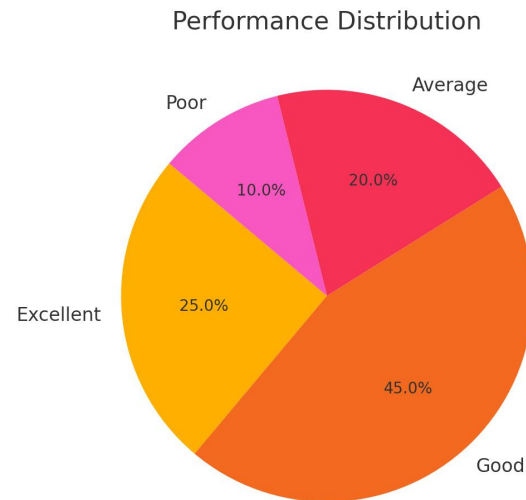

Dataset Description

- The dataset includes employee ratings, working periods, employment types, gender, states, and performance scores.

MODELLING Approach

- Using data visualization techniques and statistical models to assess and compare employee performance.

Results and Discussion

Below is the analysis represented as a pie chart:

conclusion

- Our analysis identifies trends in employee performance, providing insights to drive improvement strategies.
